

Wind Energy

Head of Service & Installation, Aalborg (Denmark)

ProCon Wind Energy offshore activities are growing globally, and we are therefore looking for an ambitious and experienced Head of Service & Installation with proven track records.

About us

ProCon Wind Energy offers and provides custom-built solutions and technical equipment to the global wind industry. We are well experienced in designing and engineering electrical systems and our offshore wind solutions cover projects within transformer and service platforms, transition pieces, and wind turbine towers.

We are dedicated to providing excellent service which is why we take great pride in complying with customer requirements. Our goal is to be a trust-worthy partner and to execute high-end projects within agreed deadline, quality and competitive pricing. Our highly experienced project managers, engineers and technicians are dedicated to performing installation, upgrading, maintenance, service and repair of new and existing installations.

The job

This job function as Head of Service & Installation gives you a unique opportunity to participate in all relevant disciplines in large scale offshore wind projects within Service and Installation as well as providing input to the upper management. You will be reporting to the Chief Operating Officer (COO).

Roles of responsibility

- Lead Project and Site Managers as well as offshore service technicians
- Implement cost effective and flexible service and installation solutions
- Develop the employees both on personal and professional level by conducting personal development meetings and preparing educational plans, etc.
- Execute streamlined processes and working instructions in close cooperation with our QHSE Department
- Calculation and input to Tender Management during project bidding process
- Participate in Due Diligence meeting with the client
- Acting as Chief Project Manager for large scale projects together with the project team to provide and give input to the time plan and financial figures
- Close cooperation and relationship management with suppliers
- End evaluation of projects /Assessment and evaluations of projects in close collaboration with employees and the clients by using PDCA model, etc.
- Part of management advisory board

Your Qualifications

You are an outgoing person who is motivated by interacting with both internal and external stakeholders with the purpose of ensuring the best service delivery to our clients. Moreover, we imagine that:

- You have a technical background, preferably an engineering degree within Electrical or Mechanical disciplines or similar
- You are an experienced leader (minimum 5 years) with strong communication skills and experience within execution of large-scale service & installation projects
- You are fluent in Danish, English and preferably German both oral and written manner
- You have a valid driver's license
- You are willing to travel as some travel activity can be expected both nationally and internationally (around 40 days annually)

What we can offer

For the right candidate there is an exciting opportunity looking ahead. We offer an attractive working environment with a good work-life balance where there is a short way from decision making to project execution. Furthermore, we offer an attractive salary package based on your qualifications and experience.

More information

For more information about the position, please contact our HR Department, Tine Hertz Hansen on phone +45 4152 5303 or send an email to thh@procon.as.

Apply

We encourage you to apply as soon as possible as we will call for job interviews regularly. Please send your application (cover letter and CV) as soon as possible to thh@procon.as, with the subject field: Electrical engineer.

Deadline

Ongoing, however we consider the incoming applications regularly until the right candidate is found. Looking forward to receiving your application soon.

In February 2019, ProCon Wind Energy A/S acquired Scanel International's Wind Division, which was established in 1996. In front of the acquisition was the former CEO (2014-2018) in Scanel International A/S, Mr. Claus Soegaard Poulsen, who had a strong vision for the Wind branch. ProCon Wind Energy A/S now has 3 departments in Denmark, subsidiaries and representation in Poland, Germany and UK Taiwan and USA – and with plans to expand further globally to become one of the top players in the industry.
